

NEW:
G®-ERGO flex made of anodised Aluminium

Spring-loaded base trolley
 with stepless adjustable spring force:
 Special requirements need special solutions!

- The spring force can be adjusted individually depending on the weight of the goods - ergonomic work at its best!
- Made of anodised aluminium
- A flexible modulation of the spring force is possible at any time, this without tools nor major retrofit.
- Intuitive handling
- Constant loading and unloading height even with goods of different weights
- Unique on the picking trolley market
- Individual in size, spring force and other features
